

CINERGY1400 DVB-T

DVB-T for Television and Video Recording on your PC!

Turn your PC into a TV with the Cinergy 1400 DVB-T. Receive digital terrestrial TV broadcasting (DVB-T) with all the advantages of the new technology: watch TV in top quality and whenever you want, record TV programs to your hard drive, edit and burn your recordings to DVD. All with the familiar comfort of your TV room, thanks to remote control, the electronic program guide (EPG) and teletext.

The Cinergy 1400 DVB-T receives its signal from an antenna as always. Just plug in the PCI card and attach the antenna—that's it! Your TV of the future is ready. The timeshift function lets you pause shows and continue watching them at a later time. The picture format is adjusted automatically, whether for the news in 4:3 format or for movies with a wide-screen cinema look at 16:9, either in fullscreen or in a smaller window—it's up to you. The Cinergy 1400 DVB-T offers, of course, teletext, but it is faster than ever and can be controlled conveniently by your mouse.

Recording is particularly simple. Use the electronic program guide (EPG) to help make a plan, program a time to record or start the recording manually. Without any loss of quality, you can cut your favorite series or blockbuster movie to your hard drive—either in MPEG-2 format or in Transport Stream format (which lets you record subtitles, too). As long as the broadcaster doesn't skimp on sound quality, your recordings will even capture Dolby Digital.

DVD MovieFactory 3 TV comes with the package and makes it easy to cut out unwanted ads and commercials from your recordings, and then burn DVDs or CDs with the option to create your own custom menus and chapters. The remote control adds additional comfort. With it, you can control all of the functions of the TerraTec Cinergy Digital 2 software, not to mention other programs, like Power DVD, WinDVD and WinAmp.

CINERGY 1400 DVB-T

Technical Details

Features

- Digital Video Broadcasting via antenna (DVB-T)
- Digital TV and radio reception*
- MPEG-2 (PS/TS) recording
- Dolby Digital support**
- TimeShifting
- Electronic Program Guide
- Teletext
- Remote Control support

* DVB-T radio is not available in all countries

** AC-3 bypass via S/PDIF

Software

- Drivers for Windows 2000 & Windows XP
- TerraTec Cinergy Digital TV software
- Ulead DVD MovieFactory 3 TV
- Cyberlink PowerDVD 6 (6 audio channels)

Scope of delivery

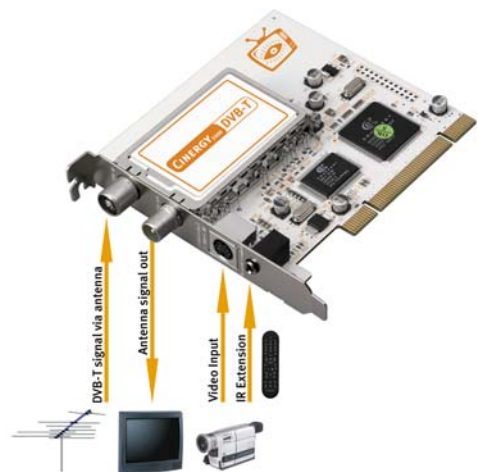

- Cinergy 1400 DVB-T PCI card
- Remote control incl. batteries
- Driver/software CD
- Manual on CD
- Service documents
- Registration documents

System requirements

- 1.0 GHz Intel Pentium or AMD Athlon CPU
- 256 MB RAM
- Sound card with DirectX support
- AGP graphics card with DirectX and Video Overlay support
- CD or DVD drive for software installation
- DirectX 9.0 or higher
- 1 free PCI 2.1 slot
- Windows 2000, Windows XP or Windows Media Center Edition
- Digital terrestrial TV reception (DVB-T)

System recommendation

- 1.5 GHz Intel Pentium or AMD Athlon CPU
- 512 MB RAM
- Sound card with DirectX support
- AGP graphics card with DirectX and Video Overlay support
- CD or DVD drive for software installation
- DirectX 9.0 or higher
- 1 free PCI 2.1 slot
- Windows XP or Windows Media Center Edition
- Digital terrestrial TV reception (DVB-T)

Art.No.: 10155
EAN code: 4017273101552
Warranty: 24 months
