CINERGY400 *USB*

Transform your notebook or desktop PC into a full-featured TV!

Receive analog TV and stereo sound in excellent quality on your notebook or desktop PC with the Cinergy 400 USB external TV adapter. You can also record films with ease and digitize analog videos.

Simply connect it to your computer's USB 2.0 port – a separate power supply is not required. The compact, lightweight tuner receives its TV signal from your household antenna or cable as usual. You can then immediately enjoy unusual viewing convenience with a multistation preview, teletext, freely scalable windows and a remote control!

You can also record programs to your hard drive with the Cinergy 400 USB and burn them onto video CDs or DVDs with the included software. Timer-controlled recording can also be set up in no time! And with the time shifting function, you can pause live programs and return to them later exactly where you left off thanks to temporary storage of the programming you missed.

In addition, you can use the Cinergy 400 USB to copy analog videos from camcorders and VCRs to your PC. Determine the format yourself: virtually all common video codecs such as DivX, MPEG1 and MPEG2 are supported, letting you minimize space requirements when archiving films on your hard drive, CDs or DVDs.

- S-Video input
- Composite Video input
- USB 2.0 interfacePower supply
- 5V DC (USB bus powered)

Dimensions
- 110 x 64 x 27 mm

Weight
- approx. 130 g

Software
- TerraTec Cinergy Application(TV software)
- InterVideo WinDVR 3(Videorecording software)

System Requirements
- Intel Pentium IV or AMD Athlon XP or Intel Centrino certified CPU with 1.0 GHz
- 256 MB RAM
- USB 2.0 interface
- PCI or AGP graphics card with DirectX compatible drivers and video overlay support
- CD/DVD drive for software installation
- Sound card
- Microsoft Windows XP / Vista
- Analogue TV reception via antenna or cable

System Recommendations
- Intel Pentium IV or AMD Athlon XP or Intel Centrino certified CPU with 1.4 GHz
- 512 MB RAM
- USB 2.0 interface
- PCI or AGP graphics card with DirectX compatible drivers and video overlay support
- CD/DVD drive for software installation
- Sound card
- Microsoft Windows XP with ServicePack 2
- Analogue TV reception via antenna or cable

Package Contents
- Cinergy 400 USB
- Infrared remote control
- Software/driver CD
- Manual on CD
- Registration card
- Service card
