

TERRATEC H5

USB universal receiver for digital and analogue TV & radio

- USB stick for DVB-T, DVB-C, analogue TV & radio
- Analogue inputs for digitalization of VHS cassettes
- Supports HDTV and Dolby Digital
- Connection via USB
- Incl. Remote control and DVB-T antenna

TERRATEC H5 is a compact and universal TV stick with three receivers for DVB-T, DVB-C, analogue TV and FM radio. Simply plug it into a free USB port, and the handy stick transforms laptop and desktop computers into a full-function television with full HDTV support (including Dolby Digital) and many additional features.

Additionally to the TV-software for your pc there are extensive accessories with a remote control and a DVB-T antenna included in the shipping package. Digitalization of VHS cassettes is easy via the analogue inputs.

Television with ultimate variety

Regardless of whether you want to follow the latest developments on the stock market or keep up to date with world news in your home office, want to watch a football match with friends or easily record all transmissions of your favourite series or current feature films in your living room - the TERRATEC H5 makes it possible. So your computer easily becomes the second television. You can receive digital programmes via the cable connection or via antenna. There is always something for you!

Software

The TV-Software developed in Germany allows the TERRATEC H5 to be used everywhere. It is simple to use, but also full of options for optimal configuration to your needs. Time-shifted television, manual and scheduled recording in lossless quality on hard disk, electronic programme guide (EPG) and teletext plus many other interesting functions deliver a fully new television experience.

The complete package

Everything you need to start enjoying the world of television on your computer is included in the shipping package.
