

CAMEO²⁰⁰ RT

Realtime Video Editing Solution

The Creativity Pack for Digital Video Editing!

Become your own movie producer! The Cameo 200 RT turns your PC into a powerful director's chair for digital video editing. The complete set offers everything you need to do just that: Real time video editing, "on the fly" burning functions for DVD and (S)VCD and turbo-fast hardware with FireWire™ interface and digital connection options for camcorders, VCRs, and the like.

How about Hollywood-style special effects? Skillful pan shots and 3D cross-fades? Or do you want to add a professional touch to your recordings with sound, music or text? No problem. Ulead Video Studio 7 offers you numerous editing functions and recording and output options for a wide variety of effects, transitions and filters to perfectly fine-tune your video editing. And the best thing about it: All of this happens in real time, without lengthy computing downtimes and other delays. An additional 300 Adorage Magic Effects are available to you. The final take is in the can? Then get it onto a DVD or (S)VCD! Thanks to Ulead Movie Factory 2, you can even burn on the fly. If you want, you can also add cool menus, frames, buttons or backgrounds to your DVD with just a few simple mouse clicks.

Thanks to FireWire™ interface, you can achieve transfer rates of up to 50 MB a second, moving data back and forth between your PC and digital camcorder or VCR at lightning speed. For connecting the hardware you want without having to mess around with plugs on the rear of the PC, there is the handy FireWire™ front module. So that the visuals of the machine itself are just as pleasing, this module comes with four interchangeable covers. You can, of course, connect the Cameo 200 RT to up to 63 other FireWire™ units such as CD burners, hard drives or scanners.
